9/24/2014	SB1400415	5701 BROAD BRANCH RD NW	Installation of 7, 2-inch diameter, monitoring wells to an estimated completion depth of 40 feet below ground surface. The monitoring wells will be installed using hollow-stem auger with a 6 inch outer diameter and a 4 inch inner diameter auger. The wells will be constructed of 40 gauge PVC with 10 feet of 0.020 inch slotted diameter screen at the bottom of each well. Number 2 sand will be used around the screen with 2 feet of medium bentonite chips extending above the sand. A bentonite/portland cement/potable water grout will then be placed from the top of the bentonite chips to just below the surface. The wells will be flush mounted with locking well caps. Soil samples and groundwater samples will be collected for laboratory analysis.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	53.90	2012 0809	4	3G		ECS MID-ATLANTI ATTN: JASON BECK	District Department of General Services Attn: Mike Quadrino	
9/3/2014	SB1400435	2607 MILITARY RD NW	We will perform a total of six soil borings on the proposed site. Two borings will be advanced to a depth of 40 feet below existing site grades, two borings will be advanced to a depth of 25 feet below existing site grades, and two borings will be advanced to a depth of 10 feet below existing site grades. All borings will be located within the bounds of the private property. The borings will be drilled utilizing 4.25-inch hollow stem, continuous flight augers and/or mud rotary drilling. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	36.30	2308 0805	4	3G		ECS MID-ATLANTIC, LLC	St Johns College INC	
9/3/2014	SB1400437	0 OREGON AVE NW	We will perform a total of six soil borings on the proposed site. Two borings will be advanced to a depth of 40 feet below existing site grades. All borings will be located within the bounds of the private property. The borings will be drilled utilizing 4.25-inch hollow stem, continuous flight augers and/or mud rotary drilling. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings/auger probes will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole/auger probe abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole/auger probe. 9/9/2014	SB1400460	908 WAHLER PL SE	We propose drilling seven, six-inch diameter geotechnical test borings using the hollow stem auger method to evaluate the subsurface conditions. The proposed test boring depths will be eight feet below the existing ground surface. Drilling equipment will be decontaminated between each hole to avoid cross contamination throughout the site. Upon completion, the geotechnical test borings will be backfilled with grout to the existing ground surface within 24-hours. The borehole will be tremie-grouted in one continuous operation with a positive displacement pump using a bentonite slurry mix from the bottom of the borehole upward. Drilling spoils including soils and water from the test borings will be containerized in 55-gallon drums to be removed for disposal after chemicallaboratory results of the spoils have been received and reviewed. Spoils will be disposed of in accordance with Federal and District laws and regulations.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	53.90	5926 0801	8	8E		GEOCAPITOL ENGINEERING LLC	District of Columbia	
9/17/2014	SB1400461	401 MISSISSIPPI AVE SE	A total of 3 soil test borings will be drilled at the above referenced site for our subsurface exploration. The borings will be drilled using 2.25-inch continuous flight augers. The borings will extend to a maximum depth of 15 feet below current site grades. The boreholes will be grouted 2 lbs of bentonite with 1 gal of water upon field work completion Any IDWs will be containerized, lab analyzed and disposed off site. The maximum annular diameter of the boreholes will be 6 inches. Maximum diameter of the boreholes will be 6 inches.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	36.30	PAR 02430058	8	8E		DMY ENGINEERING CONSULTANTS	DC DGS
